---

Buy Libra Coin with Bitcoin, Ethereum, Bitcoin Cash, etc... Libra is future of cryptocurrency and it is for everyone. If you need to buy libra coins with your Credit | Debit Card or Bank Account you will need to contact us at

## The Vision

The Vision, Libra is a global, digitally native, reserve-backed cryptocurrency built on the foundation of blockchain technology. People will be able to send, receive, spend, and secure their money, enabling a more inclusive global financial system. The Libra Association works to evolve and scale the network and reserve and leads a social impact grant-making program that supports financial inclusion efforts worldwide. The association collaborates with the global community and partners with policymakers to help further the Libra mission.

## Libra is the future, Libra is for everyone

<b>Accepted Worldwide</b> Libra is a global cryptocurrency that will be available around the world. Libra will be accessible to anyone with an entry-level smartphone and data connectivity.	<b>Decentralised Currency</b> Libra will foster an ecosystem of products and services made to help people use Libra in their everyday lives.	<b>Safe And Secure</b> Libra is a cryptocurrency, built on a blockchain designed with security in mind.
---	---	--

## The Reserve

Unlike the majority of cryptocurrencies, Libra is fully backed by a reserve of real assets. A basket of currencies and assets will be held in the Libra Reserve for every Libra that is created, building trust in its intrinsic value. The Libra Association is made up of a group of diverse organizations from around the world. The Founding Members of the association each run one of the validator nodes that form the network that operates the Libra Blockchain. One of the association's directives will be to work with the community to research and implement the transition to a permissionless network over time.

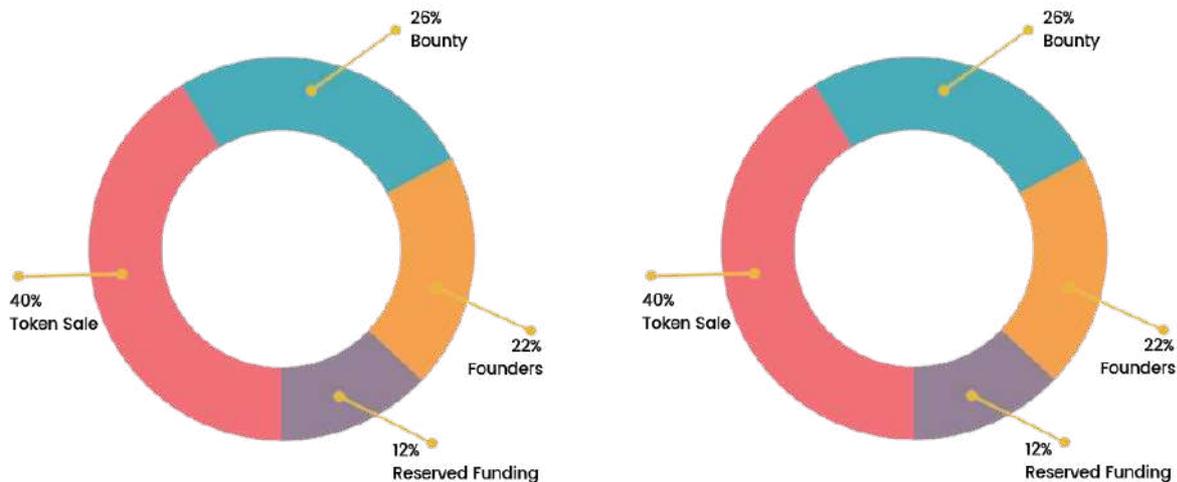

# The Blockchain

The Libra Blockchain is operated by a network of validator nodes. The evolution of the blockchain will be overseen by the Founding Members of the Libra Association, and each member will be responsible for running a validator node. As the network grows and becomes more self-sustaining, the Libra Association will work to gradually transition to a permissionless mode of operation.

Libra is backed by a reserve made to keep its value stable. Libra will foster an ecosystem of products and services made to help people use Libra in their everyday lives.
