## Products

Manufacturer and distributor of high quality Eco Porcelainic Microcement products

UK based Eco Porcelainic MicroCement is a leading supplier and manufacturer of microcement, Venetian Plasters, Polished Concrete, Polished Micro Cement and more in the United Kingdom. Our highly experienced experts team guarantees the client best product finish, cost efficiency and timely work done.

The microcement manufactured by us is quite popular among the designers and architects as it is more durable and gives modern finish. The best thing about this microcement is that it goes virtually on any sub base as its joint free. You can also give a personal touch with it by customizing the color and mix and matching with the interior. Our polished micro cement is perfectly suitable for all type of floors.

Our client list includes hotels, bars, restaurants, Retail Outlets, Shopping Malls, Car Showrooms and more. We offer our services for both Commercial and Private sector and all our Polished Plaster, Polished Micro Cement and microcement items are Bio Construction Friendly.

## Our Benefits

- **100% waterproof**
- **Easy maintenance**
- **Flexible**
- **Non slip**

## Our Micro Topping Services

Eco Porcelainic MicroCement manufactures and develops their own decorative cement and microcement products that are further used in their own projects or provided to architects and designers. We provide personal as well as professional assistance in installation of floor, wall, furniture and more for many resin flooring company. We are there to assist you any time from the starting of the project to its end. All the products that are provided by us are of high quality and are being manufactured using the latest machinery.

Microcement is basically a cement based coating for floors and walls with high abrasion resistance. One of the biggest advantages of using microcement is that it is highly customizable and can also be used as a decorative cement. You can choose from the array of colors that are available for the shade that matches your interior perfectly. Micro-topping of this cement is applied with the handy tool called trowel thus eliminating the need heavy equipments and machinery.
