

EAPower has been operating for decades supplying Marine Diesel and Gas Engine Generator, Zone 2 Diesel Engine Generator, Zone 2 Diesel Engine Air Compressor and Zone 2 Engine Power Pack to the international oil and gas, marine, energy, oilfield servicing & well intervention and mining industries.

About Us

EAPower, with a track record of over decades, is an experienced specialist provider of integrated engineering solutions to the international oil and gas, marine, energy, oilfield servicing & well intervention and mining industries.

The company's primary focus is the offshore oil and gas sector where its comprehensive suite of engineering services can be tailored to provide engineered solutions that meet the demanding and diverse requirements of projected, new and existing operational projects. The flexibility of the service also ensures that clients can choose to utilize any of the company's areas of expertise or enjoy the confidence of a fully integrated solution from project inception to completion.

EAPower specializes in the design and supply of Marine Diesel and Gas Engine Generator, Zone 2 Diesel Engine Generator, Zone 2 Diesel Engine Air Compressor, Zone 2 Engine Power Pack and Fire Water Pump Package.

With an expanding regional presence covering Asia, a highly versatile, experienced and skilled workforce and a proven strategy for future growth, **EAPower** is proactively responding to market demand and establishing itself as a trendsetter in the provision of optimized client configurable solutions in a package; providing a comprehensive suite of innovative engineering services that can be customized to meet the individual needs of each client.

Diesel Engine Driven Packages for Zone 2 Hazardous Area

EAPower will undertake an assessment of your Hazardous Area requirement; and referencing the appropriate legislative and regulatory standards, we provide a package solution which meets the requirements of ATEX Directive 94/9/EC – Equipment and protective systems intended for use in potentially explosive atmospheres.

Fire WaterPump Packages

EAPOWER provides a one stop solution for engineering, systems design and fabrication of customized pump packages. From pump selection to installation and all processes in

between, we are providing a complete custom pump package to meet the customers' project specifications with NFPA20 compliance as listed by FM/UL listing authorities.

Marine Generator Packages

Electrical power on board is serious business and you cannot afford down time. East Asia Power's marine generators are engineered to perform in the most rugged and demanding conditions. Ranging from 50kWe to 2800kWe, our EAMX Generator Sets are equipped with digital/analogue controls, external connection points for easy installation and maintenance, and deliver relentless and reliable power to keep you on the job. We ensure your system will operate as a single integral unit along all of its auxiliary systems, such as cooling systems, starting systems, controls and instrumentation.
